

★ **TRANSMISSION FLUSH ADDITIEVE**

Is a cleaning product with highly effective cleaning agents to clean the automatic transmission system.

★ **APPLICATIONS**

One bottle treats an automatic transmission system of up to 8 litres.

★ **FEATURES**

- Prior to transmission fluid change (with or without a flush machine) add the contents of one bottle to the automatic transmission system or ATF flush machine.
- Let the engine run (with shifting) for 15 minutes to circulate flush.
- Drain, flush and refill the transmission fluid from the automatic transmission system following the normal procedure. Always use recommended automatic transmission fluid when refilling.
- Cleans and flushes the automatic transmission system internally with highly effective cleaning agents
- Eliminates varnish deposits
- Restores automatic transmission system condition, smoothens and quietens gear operation.
